## Outdoor Units

### ARV 6 Series (T1&T3)

1. VER Technology
2. 180° Sine Wave Control
3. DC Brushless Fan Motor
4. Enhanced Vapor Injection DC Inverter Compressor
5. High Efficient Heat Exchanger
6. 2-stage Sub-cooling Technology
7. 4-times Anticipation Energy-saving Control Technology
8. Intelligent Defrosting
9. Precise Temperature Control
10. Auto Commissioning
11. Auto Refrigerant Recycling&Auto Refrigerant Charging
12. All-round Protection

### ARV Individual Series

1. High Efficiency
2. Long Piping Length
3. Wide Operation Range
4. Easy Installation
5. Easy Maintenance
6. Refrigerant PCB Cooling Technology

### ARV Mini Series

1. DC Inverter Compressor
2. Auto Restart Function
3. Fast Cooling/Heating Technology
4. EUROVENT CERTITA CERTIFICATION
5. Accurate Temperature Control
6. Wide Voltage Design

### H Type Modular Chiller

1. High Efficient Round Heat Exchanger
2. Back-Up Running
3. Modular Design
4. Compact Design

Powered by

## Indoor Units

### Cassette

1. Built-in Water Drainage Pump
2. Optimized Electric Box
3. Fresh Air Intake
4. Quiet Operation
5. Digital Tube Display

### Slim Duct

1. Built-in Water Pump
2. Air Outlet Panel Options
3. Ultra Slim Design
4. Flexible Air Intake
5. Silence Operation

### Mid ESP Duct

1. Flexible Air Intake Options
2. Built-in Water Pump
3. Applicable To A Variety Of Room Types

### High ESP Duct

Long Distance Air Supply

### Fresh Air Processor

1. Innovative Air Supply Technology For Excellent Room Temperature Control
2. Long Distance Air Supply
3. Applicable To A Variety Of Room Types

### Ceiling&Floor

1. Anti-condensation
2. Bigger Air Flow Volume
3. Fresh air
4. The independent electric box lid
5. Easy drainage

### Wall-mounted

1. A variety of panels can be chosen
2. Wired Control
3. 2 Ways Draining Connection
4. Convenient Installation

### HRV-Heat Recovery Ventilator

1. Adopt Centrifugal Fan With Low Power Consumption And Longer Air Supply Distance
2. Exhausting mode
3. Air supply mode
4. By pass mode
5. Auto mode
